ZET DONAUE SAMSON

Pasig City, Philippines • +63 998 280 6036 • linkedin.com/in/zet02 • github.com/Fauxx • zetsamson@gmail.com

PROFESSIONAL SUMMARY

Junior Data Engineer and Software Developer with a Bachelor's degree in Computer Engineering Technology from TUP Manila. Experienced in developing scalable Python and SQL data pipelines, batch and real-time telemetry ingestion (MQTT, InfluxDB, PostgreSQL), and cloud infrastructure automation on Google Cloud Platform (GCP). Proficient in ETL/ELT workflows using pandas and numpy, data quality validation with Pydantic, automated CI/CD with GitHub Actions and Terraform, and production observability using Prometheus and Grafana. Strong collaborator with a disciplined problem-solving mindset and a passion for dependable data foundations.

TECHNICAL SKILLS

Python 3.11 • SQL • Pandas • NumPy • ETL/ELT Pipelines • Data Validation (Pydantic) • PostgreSQL 16 • InfluxDB (Time-Series) • Google Cloud Platform (GCP) • Cloud SQL • Terraform (IaC) • Docker • Podman • Kubernetes (GKE) • GitHub Actions • GitHub CLI (gh) • Git • Linux (Fedora) • FastAPI • SQLAlchemy • Flyway Migrations • Alembic • Playwright • BeautifulSoup4 • C# (.NET) • ASP.NET Core • Dapper • Prometheus • Grafana • Grafana Alloy • Loki • REST APIs • Make / Bash

PROFESSIONAL EXPERIENCE

Software Developer Intern (SandHub API) **Feb 2026 – June 2026**
InfoTouch Corporation *Makati, Metro Manila, Philippines*

- Optimized relational database queries and reduced endpoint response latency by implementing async/await patterns and tuning MySQL connection pooling with Dapper.
- Implemented database concurrency controls using SELECT FOR UPDATE within Wallet Service transactions to prevent race conditions and balance corruption during concurrent payouts.
- Implemented input validation on incoming API requests, adding model-binding guards and error-response formatting to prevent malformed data from reaching the database.
- Built and structured ASP.NET Core 8.0 REST API endpoints following Clean Architecture principles, maintaining strict separation of concerns across Domain, Application, and Infrastructure layers.
- Collaborated within an agile software development team under the mentorship of a senior developer, actively participating in code reviews, daily stand-ups, and pull request merges via Git.

Adviser I, Sales (MSS Sales Representative) **June 2024 - Nov 2024**
Concentrix *Bridgetowne, Quezon City, Philippines*

- Diagnosed and resolved complex mobile network and billing issues by simultaneously navigating multiple internal CRM platforms and technical documentation databases during live calls.
- Maintained accurate, real-time documentation of customer interactions, account modifications, and technical resolutions in AT&T CRM systems, preserving client database integrity.

PROJECTS

IoT-Based Fire Monitoring & Cloud-Native Analytics Platform | *Python, Pandas, NumPy, InfluxDB, GCP, Terraform, PostgreSQL, Flyway, Docker, Prometheus, Grafana* **Oct 2025 – Feb 2026**
Lead Developer & Cloud Infrastructure Engineer

- Architected an end-to-end IoT data pipeline: capturing simulated MCU sensor telemetry via MQTT, routing metrics through Telegraf, and persisting raw time-series into InfluxDB.
- Engineered a multi-stage data synchronization strategy where raw time-series data in InfluxDB is continuously aggregated and transformed into relational PostgreSQL records for business reporting.
- Developed a high-throughput Python ETL script utilizing pandas and numpy for data aggregation, edge-case threshold validation, and automated bulk inserts into PostgreSQL.
- Architected and automated scalable, multi-tier cloud infrastructure on Google Cloud Platform (GCP) using modular Terraform, Cloud SQL (PostgreSQL), and Google Kubernetes Engine (GKE).
- Deployed an end-to-end Kubernetes observability stack combining Prometheus, Grafana, Grafana Alloy, and Loki to monitor system telemetry, query latencies, and service health.
- Authored and managed 19+ Flyway schema migrations, normalizing incident records, decoupling geographic metadata into a dedicated `device_registry`, and seeding high-precision NCR coordinates for spatial telemetry.

Jobflow: AI-Powered ATS Resume Builder & Job Pipeline | *Python 3.11+, FastAPI, PostgreSQL 16, Google Gemini, SQLAlchemy, Playwright, Podman, Docker* **Aug 2026 – Present**
Data Pipeline & Full-Stack Engineer

- Built a full-stack AI resume builder and application pipeline using FastAPI, PostgreSQL 16, and SQLAlchemy 2.0 ORM, featuring automated Alembic database migrations and relational data models.
- Engineered advanced web scraping pipelines using Playwright and BeautifulSoup4 with persistent browser contexts, extracting 350+ structured job postings from LinkedIn, SEEK, and Kalibrr.
- Integrated Google Gemini LLMs with strict Pydantic JSON schema validation and retry fallback chains, converting unstructured job descriptions into structured data attributes.
- Implemented a sophisticated deduplication algorithm utilizing URL normalization and external Job IDs to prevent data redundancy across multiple scraping sources.
- Containerized application services using Podman and Docker, scripting automated pre-boot database connectivity checks and Alembic schema migrations.

Autonomous AI Job Email Agent | *Python 3.11, Google Gemini, Terraform, IMAP SSL, Telegram Bot Api* **Aug 2026**
Serverless Pipeline & Cloud Automation Developer

- Architected a serverless Python data ingestion pipeline executed via GitHub Actions cron schedules to autonomously retrieve, parse, and classify incoming communications 24/7 over IMAP SSL.
- Provisioned CI/CD workflows and repository secrets declaratively using Terraform with the GitHub provider, enforcing Infrastructure as Code and zero hardcoded credentials.
- Implemented exponential backoff retry logic for external API rate limits and flat-file UID caching to guarantee zero duplicate record processing across scheduled pipeline runs.

EDUCATION

Bachelor of Engineering Technology major in Computer Engineering Technology **Aug 2026**
Technological University of the Philippines (TUP) *Manila, Philippines*
